- 10 contest problems during a regular week is fine but during a busy week such as midterms or interview weeks is really too much. Can we lower this part or make it more flexible?
- Professor Lim is one of the best teacher I have had in Columbia. He works hard to prepare lectures and office hours to let students have a deeper understanding on solving coding questions. Definitely recommend others to take this course in the future.
- This course is amazing! Super helpful to prepare for interviews and teach practical algorithmic thinking. It should be offered to keep our students competitive in the tech space.
