Response Rate	7/52 (13.46%)

• An excellent class that helped me land an internship for the summer

• The department should have opened this course long ago. I was fortunate enough to take this course before graduation. This course helped me get an offer from a FAANG company. The most helpful class I have taken at Columbia University so far.

• The course is an essential for our CS students looking for a job in industry, it properly prepares everyone for interviews and success in them.

• This class is my favorite at Columbia and I hope other students get to experience it too!

• This course is really educational and helpful in terms of learning about competitive programming.

• Very helpful course for interview preparation.

• The grading process was very fair and Professor Lim organized the entirety of the class quite nicely.

11 - If so, please explain why

Yongwhan Lim

Response Rate	23/52 (44.23%)

• Yongwhan has always been very approachable, friendly, and helpful.

• The professor is really knowledgeable in the area he is teaching.

• The professor takes his own time out to help me prepare my resume and practiced mock interviews with me multiple times. Because of his help, I was well-prepared for the interview. In the end, I received a summer internship offer from Apple. His class taught me a lot of things about data structure and algorithms. It focuses a lot on the application instead of theory. I ended up using the knowledge from the class in my projects and interview preparation a lot. It is way more useful than theory class to me.

• Professor Lim himself works at Google, is familiar with the interview process of large companies, and has first-class problem-solving skills for algorithms. Professors also value student feedback and continually adjust course content to help students achieve maximum benefit.

• This has been my third year at Columbia however Professor Lim has been the first professor in SEAS that seems like they really care about the well-being of their students. He is very eager to see us succeed inside and outside the classroom and is always making sure that we are okay as students. When I was struggling with the course, he went out of his way to make sure that I could perform better and taught me a lot along the way. He also challenged us to do and be better but also made sure that it wasn't demoralizing.

• Learned a lot from him!

• Prof. Lim is very nice and patient. He gave me a lot of help during my learning journey.

• He is so helpful and spent a lot of time on helping students.

• He really cares about students success in and out of the classroom and is in a constant state of trying to improve his course and delivery, and takes all suggestions seriously.

• He is a beast!

• The most responsible professor ever. So nice and patient, and willing to stand at the students' perspective. I highly recommend his courses.

• Very helpful and knowledgeable.

• The nicest professor I've ever met. He cares a lot about his student. He listens opinions of his students and improve his course.

• He prepared us with the most useful skills for tech interview and provide us insights as a intructor wtih industry experience, also like a friend to us,

• The support and lecture quality from the instructor was amazing. Also, he is really responsive to any type of communications (course-related questions, career coaching, and so on).

• Professor is soooo nice!

• He is really generous and warm-hearted. He truly care about our career suceess!

• He truly cares about his students and have a consistent desire to improve himself and course!

• Professor Lim is a very nice instructor. He is very willing to help us outside of the course, and his material is also very helpful to me.

• He is too good and caring about the students. I believe that distinguishes him from other faculty.

• Professor Lim cares a lot about each and every one of his students. Now, I know this is true for every teacher at Columbia but I feel that Professor Lim's approachability was one-of-a-kind. Rather than a teacher, I thought of Professor Lim as a mentor and a friend who cared deeply about my success going forward. Even now, after finishing his class, I am looking forward to staying in touch with him and continuing to discuss job opportunities, career growth, etc as I graduate and move on in life.

• Professor Lim did a great job on teaching this course and I've learned a lot.

• Professor Lim is super smart, nice and helpful. His course is the most practical course that I've taken in Columbia.
